Remittances

Customer's personal checks preferred and will be customer's receipt. Any other form accepted.

Guarantee

Knowing that our success depends upon the satisfaction given our customers; we guarantee all shipments to reach customers in satisfactory condition and be true to name.

Disclaimer

Most of the failures with seeds and bulbs are due to causes entirely beyond our control, such as unfavorable weather, too deep or too shallow planting, slugs, etc.; therefore CONRAD-WAGNER BULB CO. give no warranty, expressed or implied, as to description, purity, productiveness, or any other matter of any seeds, plants, bulbs, etc., they send out, and will in no way be responsible for the crop; if the purchaser does not accept the goods on these terms they are to be returned at once.

Shipping Seasons

The shipping seasons are of course dependent upon the range of the planting seasons. It is advisable to order EARLY and we will deliver as the stock is ready to plant.

GLADIOLI

CULTURE OF GLADIOLI

Summer Flowering Type
Plant December to May—Blos-
som time May to September.

(Delivery time November to
March)

Since the publication of our last catalogue, we have added many new patrons and friends, indicating that we will have a larger field this season into which to introduce "THE FLOWERS OF GLADNESS" and the bulbs which "MAKE THE NEW YEAR GLAD."

GLADIOLI

There is no other flower which will give such great beauty and returns for the small amount of the investment. No flower will grow with so little care and the gladioli is beyond comparison with other flowers as a garden flower, and makes a wonderful decoration for the home when cut. Mass planting and sequence of three weeks between planting brings a continual blooming season in your garden.

WHERE TO PLANT

You do not have to restrict your plantings in rows or beds. Try planting them among the roses and shrubbery. Mix them in with the zinnias, marigolds and asters, and Halley planted with light blue delpiniums is a wonderful combination.

WHEN AND HOW TO PLANT

The culture is the easiest of any bulb. Plant in California from December to May (or after frost is past in colder climates) placing the bulbs six inches apart and about three to four inches in depth, in good mellow soil. Avoid excessive fertilizer at planting time, but a little bone flour will aid in growth. Frequent waterings are necessary to keep growth

advancing steadily, and do not be afraid to cultivate after watering. The three Rs of good glads are GOOD SOIL, FREQUENT CULTIVATION and PLENTY OF WATER. After flower is through blooming, dispense with watering, cut the spike off near the ground (leaving four leaves) and when thoroughly ripe, lift bulb and store until planting time, in shallow box.

GLADIOLI

FLOWERING BULBS
EACH 75 c

SPANISH AND HOLLAND IRIS

(Plant During September)
(FLOWER TIME—APRIL
MAY)

One of the most satisfactory varieties of Iris to grow, being particularly hardy. The flowers are of great beauty, having many different blendings of color, and if cut, when in the bud will last a long time in water. For best effect they should be planted in clumps or masses of from 25 to 100 or more bulbs, set 6 inches apart and 2 to 3 inches deep. They grow 18 to 24 inches high and bloom from the end of March on through June.

(These should be planted during September. Orders should be booked early, and we will not supply after November 30th. All orders booked subject to crop production.)

SPANISH IRIS

	Each	Doz.	100
RECONNAISSANCE—Bronzy bronze10	.75	5.00

MIXTURE OF HOLLAND AND SPANISH IRIS

	Doz.	100
ALL COLORS IN MIXTURE75	5.00

GERMAN IRIS

These are all sun-lovers, and delight in a warm, well-drained situation, where the surface-creeping rhizome can get a good baking in summer. They will thrive in almost any soil or situation except a wet one, which causes the rhizomes to decay rapidly. This is the group best known and most commonly cultivated. The flowers are the true fleur-de-lis, and they are well called the "orchids of the garden," for they fairly out-rival the orchids in delicacy of structure and wide range of coloring, including rich yellows, soft blue, intense purples and claret-reds, beautiful bronzes and pure whites, in every conceivable combination.

CULTURE—A dry, sunny location suits them best. In wet places they are likely to decay. They may be planted in early spring, but the most favorable time is during August and September, the earlier the better, as that is their dormant season, after which they make a root-growth, becoming established before winter. Nearly all Irises may be divided and replanted successfully immediately after flowering if the roots are not allowed to become dry.

	Each Doz.	Doz. 100

IRIS STYLOSA

(Midwinter Flowering Iris)

These Iris are incorrectly called by some the Peacock Iris and are short stemmed early blooming varieties.

AUGUSTIFOLIA—Dark blue	\$.25 each
MARGINATA—Blue25 each
JAPANESE BUTTERFLY—Variegated blue50 each

SUSIANA MOURNING IRIS

This is a very beautiful and quaint Persian variety growing about 18 inches tall and blooming in April and May. The large flowers are chocolate light gray veined with a network of chocolate lines. The rhizomes should be set three inches deep and twelve inches apart. Stock very limited this season. Strong roots. **Price—\$1.00 each.**

DARWIN TULIPS

**Plant October-December
Flower April**

Darwins are the most satisfactory of all Tulips. They are stately in appearance, attaining a height of 24 to 30 inches, and producing beautiful globular flowers of heavy texture in a large range of colors. They bloom in April and May and are unsurpassed for bedding and cutting.

Tulips can be planted from October till late in December. They require a moderately rich soil, which should be well drained. If the soil is in poor condition use a little bone meal or well rotted manure. Plant the bulbs six or more inches apart and set the tops three inches below the surface. If the soil is heavy, place a small quantity of sand at the base of each bulb. They will remain in bloom for a longer period if planted in a light, shaded location.

	Each	Doz.	100
CLARA BUTT—Soft salmon rose	\$.10	\$.65	\$ 4.50

DAFFODILS

PLANT OCT.-DEC.—FLOWERS FEB.-MARCH

To briefly explain the words Narcissus and Daffodils, Daffodil is the English name for a large family of plants, and Narcissus is the Latin name, in other words, they are the same thing. However, custom has decreed that they do not mean the same thing, hence the confusion.

The word Narcissus is generally confined to the pure white petaled division like the Poeticus and to the bunch flowered varieties like the paper white. All others are in popular language Daffodils.

We list only the better and the newer varieties. They bloom in March. For outdoor planting, set before December in rich ground four inches below the surface and four to six inches apart.

FREESIAS

(For delivery until October 1st)

Although the culture of Freesias is simple and easy, there is a drawback in that the bulbs have a habit of going on strike. You may plant a nice young bulb which looks the picture of health, which for a whole twelve months gives no signs of life and then starts to grow as if nothing had happened.

The variety most known is the white Freesia Purity, the one grown at Santa Cruz for commercial purposes. We are offering this season some decided acquisitions of merit, with strong branching stems.

PURITY—Finest and purest variety, large flower and of strong growth	Doz.	100
	\$.30	\$ 2.00

RANUNCULUS

(FLOWER TIME—MARCH-APRIL)

These spring flowering bulbs are unrivaled for lovely form and dazzling colors. The bulbs are miniature dahlia-like roots sometimes called "crow-feet" and should be planted pointing down. Bulbs should be soaked over night before planting one inch in depth and six inches apart in partially shaded location.

DOUBLES (Persian)

SWEET PEAS

PLANT MORE SWEET PEAS

Sow sweet pea seeds in November and December for early spring flowers. The soil for sweet peas should be rich and deep. Prepare the ground by giving a liberal dressing of well-rotted manure and bone meal. Sow the seed thinly one inch deep, and thin out to six inches apart, as flowers will not be large if too crowded.
